

Retail Compliance for a Changing World.

As the Internet of Things (IoT) continues to expand, more and more connected devices are entering the market. These devices collect massive amounts of consumer data which can be strategically used by companies to enhance credibility, safety, and quality for customers, partners and society in a global connected and digital world. Data impacting product safety is gathered from multiple points throughout the product life cycle: sourcing, manufacturing, testing and end-consumer use. With our global expertise, we can help you develop new markets and have your product tested, certified and shipped to its destination as efficiently as possible.

Supply Chain

With services designed for the retail supply chain, TÜV Rheinland provides a one-stop solution for product quality and compliance.

PRODUCT SAFETY

As a Nationally Recognized Testing Laboratory (NRTL) we carry out conformity assessments and confirm all safety requirements have been met to ensure a smooth transition to market with a cTUVus certification.

WIRELESS / IOT TESTING

With the expansive IoT market, our global wireless testing locations offer interoperability & performance testing, ensuring regulatory compliance and product certification.

CYBERSECURITY / DATA PRIVACY

End-to-end cybersecurity services portfolio spanning from IoT and Application security, risk & compliance management, and data protection including the GDPR.

CHEMICAL TESTING

Our first-class testing facilities and world-class experts help you comply with international environmental regulations, ensuring product compliance and reducing risks for consumers.

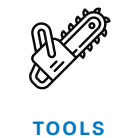

RETAIL INSPECTION SERVICES

We help retailers at all stages of the supply chain, from factory evaluations to production checks to loading supervisions.

MARKET ACCESS SERVICES (MAS)

Your single point of contact for multi-country approvals, technical guidance, project certification and management, and regulatory research.
