

Site Supervision During Construction

Identify project risks

Overseeing and coordinating the construction of industrial facilities is a demanding job. Supervisors have to consider several different aspects including material quality, on-site safety, compliance issues and deadlines.

We provide your project team on-site assistance in evaluating component quality, optimizing installation activities and preparing required documentation. In addition, we make sure that the quality of manufacturing and construction is fit for purpose and in accordance with current energy, environmental and economic guidelines, enabling smooth and expeditious project progress.

INCREASE TRANSPARENCY AND OVERALL QUALITY AT YOUR CONSTRUCTION SITE

Throughout the entire construction phase, our independent inspectors are on-site to observe and record the day-to-day progression of new-build or major maintenance and refurbishment projects. We keep a complete log of general progress, important milestones and challenging issues.

Increased transparency and traceability resulting from our detailed documentation allows you to easily follow project processes in order to make course corrections to avoid cost overruns and save resources.

BENEFITS AT A GLANCE

Throughout the entire construction phase, our experts help you to:

- Improve and ensure safety with early risk detection.
- Address issues and bottlenecks quickly.
- Stay on schedule to avoid costs resulting from missed deadlines.
- Meet high quality and safety standards by providing you detailed documentation and individual assessment with specific suggestions for improvement.

OUR EXPERIENCE - YOUR BENEFIT

With years of experience in many areas of specialization and our global network of experts, we are able to offer multiple complementary services for construction, erection, modification and refurbishment projects. In addition to inspecting materials and equipment, we make sure that health and safety requirements are met on site.

ABOUT TÜV RHEINLAND

TÜV Rheinland is a global leader in independent inspection services, founded in 1872. Our experts inspect technical equipment, products and services, oversee projects and help to shape processes for companies. Since 2006, TÜV Rheinland has been a member of the United Nations Global Compact to promote sustainability and combat corruption.

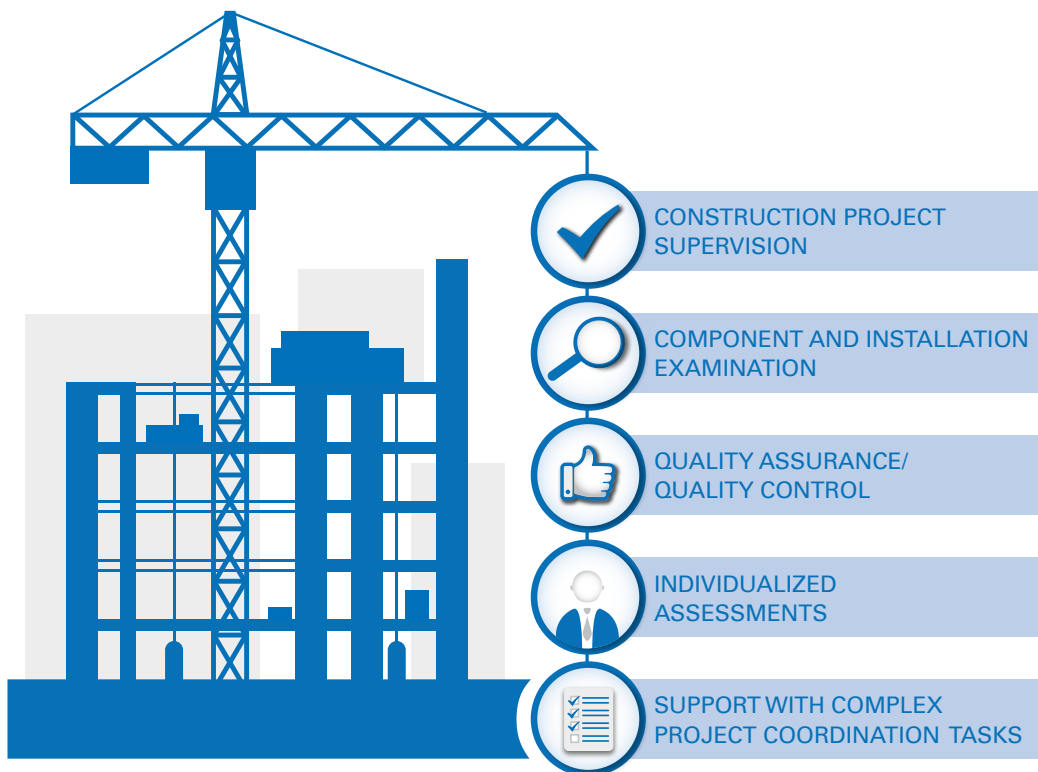

IMPROVE QUALITY ASSURANCE WITH COMPREHENSIVE CONSTRUCTION SITE SUPERVISION

Our independent inspectors on site help identify risks to the project in terms of delivery times, schedule and general quality. We provide essential documentation for each asset through comprehensive monitoring during the delivery, installation and commissioning phases.

Not only do our experts help you keep costs under control, meet compliance standards and coordinate contractors, but they also assess individual situations and suggest specific strategies for improvement. Our comprehensive site inspection services offer you tools to ensure your project is completed on schedule and meets standards of high quality.

From materials testing and construction coordination to planning complex tasks and laying down work safety measures, we support you at every stage of your project. Partner with us to receive quality assurance and increased quality control at your construction site!
