Product Safety: Compliance Testing & Quality Assurance Services

In today's challenging world, choosing the right quality assurance partner can make the difference between success and failure. TÜV Rheinland Group specializes in toy safety so we understand the difficulties companies face in risk management for this complex and highly regulated product category.

Our global network of technical experts put their local market knowledge to work for you, giving you streamlined solutions, best market practices, up to the minute regulatory and compliance information, and online access to test certification data. The broad portfolio of services we offer is designed to ensure compliance with ever-changing international requirements, to protect your brand and to help you get products to market faster, saving you time and money.
