

Empowering Technical Competence

The business world is undergoing very dynamic change. Traditional jobs are disappearing and new ones are emerging. The need for technical know-how and well-educated professionals is greater than ever before and continues to increase worldwide.

TECHNICAL COMPETENCE FOR YOUR OPERATIONAL EXCELLENCE

TÜV Rheinland Academy is the leading competence companion for all technical topics, with which companies and the public sector can improve their operational excellence or which are part of the requirements specifications, including quality management, environmental management, occupational health and safety as well as IT security and data protection. Our portfolio also includes future topics such as the Smart Factory and Future Mobility.

These technical topics and their associated applications, services and devices are advancing rapidly at this time, so for building competence we start with dynamic sources such as seminars, trainings and courses and with lecturers who follow this dynamic development in the real world – both in open area as well as in-house. For us, the learner is always the focus: Therefore our training is also appropriate for the most varied levels of expertise. Whether basic, advanced or expert: We reliably bring technical personnel and management up to the required level and consult human resources managers with an eye to expedient HR development concepts.

Obtain first-hand highly current knowledge of innovations and best practices and turn it into your competitive advantage.

Education Digitalization Management System

TÜV Rheinland Academy offers you solutions that cuts across the whole educational management system in terms of digital learning.

In accordance with the presage of the “new normal” brought about by the said global health crisis, the Commission on Higher Education (CHED) has encouraged all higher education institutions (HEIs) to optimize alternative learning or flexible learning systems, including online learning while the Department of Education (DepEd) has looked into the use of various flexible learning options (FLOs) such as alternative delivery mode, distance learning, homeschooling, online learning, and alternative learning system for basic education to ensure learning continuity.

Moving through these transitions with well-equipped human and learning resources, we would like to offer the following Technical Assistance and Consultancy Services for effective and responsive Education Digitalization Management System

RESPONSE PHASE (SHORT TERM)

Capacity Development Program

- Teacher Empowerment Program (TEP) on Flexible Learning Options (FLO's)
- Skills Inventory Assessment and Competency Improvement Road Map
- Gap Assessment of the Learning Institution in compliance with Flexible Learning Models and/or Alternative Learning System

RESILIENCE PHASE (LONG TERM)

Educational Sustainability Program

- Global best practices consistent with ISO 9001- Quality Management System, ISO 21001-Educational Organization Management System, ISO 31000-Risk Management)
- Digitalization of key Educational processes (school records, grading system and other issuances)
- Learning Continuity Plan thru Business Continuity Management System (ISO 22301)
- Personnel Certification Services
