Training / Education	Management System Certification	Grid Connection
Project Planning Services	Coating Inspection Services	CE Marking

Health and safety services for personnel working in the Wind Energy Sector.

The work on an offshore wind farm is extremely demanding. The special working and living conditions have a great impact on the well-being of the workers. In addition to requirements of hard physical work, often performed at great heights, long shifts and exposure to extremes of heat and cold, the restricted privacy and long periods away from home also have significant effects on the health of the workforce.

In order to maintain the physical and mental health of workers especially at offshore wind farms, it is necessary to carry out regular checks of their working conditions and undertake an examination of the workforce at predetermined intervals.

Our experience - your benefit

With 40 years of experience in health and safety services we can deliver tailored services to help customers face the modern day-to-day challenges of the industry. Our network of experts in the occupational health and safety business are there to support you increase employee satisfaction and motivation, thereby preventing losses of productivity.
