

Chartered Engineer Certificate for Used Machinery Exported to India

Chartered engineer certificate issued by the authorized inspection company registered with Indian Directorate General of Foreign Trade (DGFT) is a compulsory requirement for the export of used machinery to India. Failure to provide a Chartered Engineer Certificate for used machinery exported to India can result in the rejection or detaining of the machinery at Indian customs.

As a globally recognized inspection, testing and certification company, TÜV Rheinland is authorized by Indian Directorate General of Foreign Trade (DGFT) to provide Chartered Engineer Certificate for any used and refurbished machinery exported to India.

We have strong experience of safety testing, inspection and certification for Industrial Machinery. TÜV Rheinland offers programs designed to assist companies achieve industrial machinery certification for a number of standards and regulations including CE Marking and Machinery Directive 2006/42/EC. We also help organizations with risk assessments, damage investigations and verify compliance with accident prevention regulations.

For the Chartered Engineer Certificate, the scope of inspection and valuation are as follows.

1. Visual inspection of machinery's physical condition.
2. Assess working condition of the machinery.
3. Valuation of the present market value of the machinery.
4. Verify Country of Origin and Year of Manufacture.
5. Assessment of machinery's residual life.

TÜV Rheinland provides technical support for testing, inspection and certification services. For more information, please contact:
