

## BOI USER MACHINERY INSPECTION

TÜV Rheinland is a global leader in independent inspection services, founded more than 140 years ago. The group maintains a presence in 69 countries with 500 locations.

Testing Services include chemical, physical, electrical safety and performance tests for a broad product range as household appliance, IT, automotive, furniture, textiles, toys, stationary and medical. Inspection services include various industries as Rail, Energy, Oil & Gas, Steel, Automotive and Machinery. Certification with experienced experts, we audit and certify management systems for companies and organizations in accordance with international or client specific standard.

Machinery inspection service is one of TÜV Rheinland's outstanding services. The inspection is focus on safety because defective machinery can cause damages, production downtime, and numerous accidents. Our inspection will increase the users' confidence in the reliability of industrial machines because we are an authorized and appointed body of examiners for machinery in accordance with EU Directive 2006/42/EC machinery guidelines.

In Thailand we provide the inspection of any machine imported to install in BOI project following BOI announcement no. 2/2557 and no. 6/2558 with the scopes of inspection as follows

- **Visual inspection for physical condition**
- **Machine information verification**
- **Witness running test/performance test**
- **Safety and emission inspection**
- **Price Evaluation**

The documents required for this inspection are Commercial Invoice, Proforma Invoice, Packing List, Preventive Maintenance document and Recondition document in case the machine ages over 10 years. During the inspection, machine has to be operated and the result of operation/production will be inspected by our inspection engineer.

The certificate will be issued if the inspection result is satisfactory. For more information, please contact
