

# Agricultural Commodities

Accurate and reliable testing, inspection, and certification solutions for agricultural commodities

As a trusted agricultural third party inspection body, our aim is to protect the interest and reputation of our clients in the best possible way. That's why TÜV Rheinland, member of the TIC Council (formerly IFIA), offers a full range of agricultural commodity inspection services that helps mitigate risk and protects interest throughout supply chain of source or destination.

We supervise cargo loading, discharging, weighing, and screening in detail, as per the required specifications. Our qualified surveyors across the world are ready to provide services such as tank and hold cleanliness, round the clock supervision, weighing, sampling, and analysis.

**Rooted in Germany – and at home all over the world:** The internationalization of TÜV Rheinland began in 1970. Today, we have operations in some 60 countries on all continents.

## About TÜV Rheinland

For more than 150 years of quality and safety, TÜV Rheinland's mission has been to make technology safe for people and the environment. From the steam engine to digitalization, what started as a regional association for the monitoring of steam boilers has evolved into a global testing service provider.

Today, TÜV Rheinland ensures safety and quality in almost all areas of business and life. This shared commitment unites more than **20,000** employees. TÜV Rheinland's experts test technical systems and products around the globe, support innovations in technology and business, train people in numerous professions, and certify management systems according to international standards. By ensuring safety and sustainability, TÜV Rheinland is also shaping the future. Since 2006, TÜV Rheinland has therefore been a member of the United Nations Global Compact for more sustainability and against corruption.

**2006** Since 2006, TÜV Rheinland has therefore been a member of the United Nations Global Compact for more sustainability and fight against corruption. 238 group-network laboratories all over the world work on our clients' behalf to inspect the safety, quality, functionality, and ergonomics of products from a very wide range of sectors. Worldwide, TÜV Rheinland has roughly 780 of what are known as accreditations, an official recognition permitting the performance of tests from national authorities.

**238** group-network laboratories all over the world work on our clients' behalf to inspect the safety, quality, functionality and ergonomics of products from a very wide range of sectors.

The testing of products, for example: 80 percent of the business is done outside Germany because the tests logically take place where products are manufactured. Worldwide, TÜV Rheinland has roughly 780 of what are known as accreditations—an official recognition permitting the performance of tests—from national authorities.

**1872** was the birth year for the "Verein zur Überwachung der Dampfkessel in den Kreisen Elberfeld und Barmen" ("Association for Monitoring Steam Boilers in the Districts of Elberfeld and Barmen") from which TÜV Rheinland would later emerge.

## Commercial Inspections

For many Companies, International Trade is a mainstay. Traders (buyers, seller or manufactures) often demand the goods and commodities to be inspected in terms of quantity, quality and other characteristics in accordance to mitigate any risk or non-fulfillment of the contractual agreement. TÜV Rheinland with worldwide network is the reliable partner in today's globalized world of trade to achieve confidence on your transacted goods and commodities. Commercial inspection is a service in the global trade that serves the smooth movement of goods. Our Commercial inspections services can be conducted in connection with a letter of credit or any industry relevant requirements to ensure that the supplies from exporting countries are according to trade requirements.

## Key Commercial Activities

- Agriculture: We create value and mitigate losses at all stages right from production in fields to market retail stores.
- Metals and Minerals: We monitor complete supply chain right from mining until end users.
- Consumer Products: We cover wide range of products for safer and reliable products.
